Subject: RE: FW: Trouble with ECARUCA outcome

Dear Madam Dirks,

Thank you very much for your reply and for your helpfulness.

In details, I'd like to get a list of patients affected by OFCs whose microarray data are reported.

Particularly, the items I checked for my research ("search by clinical features") were:

- Cleft of the lower lip
- Cleft upper lip (non midline)
- Midline cleft upper lip
- Cleft palate
- Submucous cleft palate
- Cleft uvula
- Cleft alveolar ridges

Every time I tried to get the list, firstly I selected these features, secondly I typed "1" in the "minimal number of features" textbox and finally I set the condition "exclude all cases without microarray data".

Thank you in advance for your help.

Please don't hesitate to contact me if you need further information.

Have a nice day!

Best Regards

federica
